

Soundarya

CRAFTING PERFECTION

SINCE 1992 . CRAFTING . PERFECTION

Soundarya is a bespoke interior solutions provider for homes, hotels, offices, and retail spaces.

At Soundarya, we bring you closer to perfection with everything we do.

We combine the world's best raw materials with fine Indian craftsmanship traditions and responsible business practices. Our fully integrated services and state-of-the-art equipment enable us to work smartly – both on and off-site – and in tandem with other building activities, eliminating costly delays.

By merging attention to detail and a keen eye for the bigger picture, we craft exquisite interiors – and deliver unparalleled efficiency- executed with skill and expert precision.

“Bringing spaces to life is what we do, every single day.”

CRAFTING EFFICIENCY

In our fifteen-acre manufacturing facility in Chennai, perfection is a lived, shared experience.

CNC machines, veneer handling equipment, and precision wood-handling machines deliver efficient finished products on time and with greater accuracy, irrespective of the fact that your woodwork happens offsite.

“We invest in the future to bring you world-class products, today.”

Our state-of-the-art manufacturing facility handles high-volume production every single day with next to no errors made. Moreover, because production happens off-site, your woodwork material is ready for you even as your space gets ready.

CRAFTING COLLABORATION

For three decades now, Soundarya has been offering both standalone and turnkey interior solutions.

This is why some of the world's most significant brands trust us. With innovation at its core, our process entails several pre-engineered concepts that can be used on a plug-and-play basis across any design need.

“Through partnerships, we deliver end-to-end woodcrafting solutions to bring warmth into spaces, and into life.”

Our partners trust us to bring creativity and innovation to all that we do. At Soundarya, our focus is on high-quality, safe delivery of projects on time, sustainably.

“When we come together, we create the world.”

We have helped bring large office spaces to life and build dream homes, and created places that people love to visit. Our dream is to bring world-class woodwork and finishing to each project, so that hotel room feels like home, and that kitchen space makes memories.

With a global network of partners, we seamlessly handle projects even with a short lead time, and take immense pride in adapting to changes as they happen.

CRAFTING
THE WORLD

Woodwork is an art, and one that we have perfected over the years. Yet, it is also a science, the study of which allows us to deliver results across the projects we work on.

“This is where form truly meets function, and the result is here for all to experience.”

Commercial Spaces

Designing for fun, for collaboration, and for life

Going to the movies, having a meal, shopping with friends, and being with family- these are just some of the many experiences that we at Soundarya help craft.
